

Dakota Midland Grain Mobile Website

Dakota Midland Grain has gone mobile, we now have a “mobile ready” website. It is a streamlined version of our main website that is specially formatted for ease of use on mobile devices (phone’s, tablets, etc..) It will include up to date cash grain prices as well as other pertinent information. This being said, a lot of information/features will still only be available on our regular site.

When you open our regular website (www.dakotamidland.com) on your phone or device it should prompt you wondering if you would like to view our site in the mobile version. Once you get the mobile version up you can also create a short cut in the form of an icon on your main screen. (Similar to app icon)

I Phone’s – Once you have our mobile website up select the “share button (usually an arrow) and select “Add to home screen”, pick a name for it such as DMG (default name) and click add. Check main screen to find and test link.

Android devices- Once you have our mobile site up tap on the 3 dots in the upper right corner select the “Add to home screen” option; pick a name for it such as DMG (default name) and click add. Check main screen to find and test link.

This should enable one touch access to our mobile website, please call with questions or comments!
